_____

Prostatitis is a common male disease that occurs on prostate gland. This disease has four common types which are: acute bacterial prostatitis, chronic bacterial prostatitis, chronic nonbacterial prostatitis and Chronic prostate pain syndrome(CPPS). Prostatitis usually brings urgent urination, frequent urination, painful urination to men. This disease not only has high relapse rate, but also is hard to cure. So many men are curious that have sexual dysfunction got connection with acute prostatitis? Dr. Lee will answer this question by give details of its symptoms and complications.

Systematic symptoms
When affecting this disease, men can experience fever, vomiting, chills and so on. When this disease becomes sever, men even can shock, because bacteria enter into blood circulation, leading to toxic septicemia.

UTI symptoms
Prostatitis patients also can experience those symptoms which are similar with UTI's. When patients has difficult in urinating(urine cannot be flushed out and stays in bladder for some reasons) and bloody urine that means this disease become severer.

Sexual dysfunction
Prostatitis men also have the chance of experience painful sexual intercourse, painful erection, ejaculation, impotence, and blood semen. So, sexual dysfunction has connection with acute prostatitis. However, one has had sexual dysfunction, that doesn't mean this person has had acute prostatitis, for his sexual dysfunction also can be caused by other reasons such as epididymis and so on.

All in all, once you have had sexual dysfunction, please go and see doctors. He or she will recommend some tests for you to lower down options. If your sexual dysfunction do is caused by acute prostatitis, please receive treatment - antibiotic, massage, pain killer or herbal medicine named Diuretic and Anti-inflammatory Pill as soon as possible. And when your acute prostatitis is cured, your sexual dysfunction will disappear too.
